

A diagram illustrating a background layer structure. It features a large rectangle divided into two main horizontal sections. The left section is blue, and the right section is gray. A vertical line separates the two sections. Two labels, 'bg back' and 'bg 1C', are positioned in the center of the rectangle, overlapping the vertical line. The label 'bg back' is above 'bg 1C'. The entire diagram is enclosed in a red border.

bg back

bg 1C

A diagram of a book spine. It features a central vertical blue bar. Two white rectangular labels with black borders are positioned on this bar. The top label contains the text 'bg spine' and the bottom label contains 'bg S'. The entire assembly is set against a light gray background, which is itself within a larger white frame. Red lines mark the top, bottom, left, and right edges of the white frame.

bg spine

bg S

The diagram shows a window layout with three main rectangular areas. On the left, there are two overlapping gray rectangles. The top-left rectangle is slightly offset to the left and top relative to the bottom-left rectangle. On the right, there is a large blue rectangle. In the center, where the two gray rectangles overlap, there are two white rectangular labels with black borders. The top label contains the text 'bg front' and the bottom label contains the text 'bg rC'. The labels are positioned such that they appear to be in front of the gray rectangles. The entire diagram is set against a white background with a red grid.

bg front

bg rC

bg back and spine

The diagram shows a book cover layout. A large blue rectangle on the left represents the spine and back cover. A large grey rectangle on the right represents the front cover. A vertical line separates the two. Two white rectangular labels with black borders are positioned in the center, overlapping the vertical line. The top label contains the text 'bg back and spine' and the bottom label contains 'bg 1C-S'. The text is in a blue, monospaced font.

bg 1C-S

bg front and spine

bg S-rC

bg whole

bg lC-rC

A diagram of a control panel or interface. It features a light gray background with a darker gray border. On the left is a large blue rectangular area. To its right is a vertical column containing two white buttons with black borders. The top button is labeled 'back' and the bottom button is labeled '1C'. To the right of this column is a large gray rectangular area. The entire interface is overlaid on a white background with a red grid.

back

1C

A diagram showing a horizontal gray rectangle with a vertical blue bar in the center. The blue bar has a white rectangular label with the word "spine" in blue text. Below the "spine" label, on the same blue bar, is a smaller white rectangular label with the letter "S" in blue text. The entire diagram is set against a white background with red grid lines.

spine

S

A diagram showing a horizontal rectangle divided into three vertical sections. The left section is gray, the middle section is white and contains two vertically stacked labels 'front' and 'rC', and the right section is blue. The entire rectangle is surrounded by a light gray border. Red lines are visible at the top and bottom edges of the diagram.

front

rC

back and spine

1C-S

front and spine

S-rC

A diagram showing a large blue rectangle representing a whole, with a gray border. Inside the blue rectangle, there are two smaller white rectangles stacked vertically in the center. The top white rectangle is labeled 'whole' and the bottom one is labeled '1C-rC'. Two vertical black lines extend from the top and bottom of the 'whole' rectangle to the top and bottom of the '1C-rC' rectangle, respectively.

whole

1C-rC

above back

The diagram shows a large gray rectangle with a black border. Inside this rectangle, there is a smaller white rectangle with a black border. The white rectangle is centered horizontally and contains the text 'above back' in blue. The gray rectangle is divided into three vertical sections by two thin black lines. The white rectangle is positioned in the middle section. The entire diagram is set against a white background with a light gray border. There are also some red lines and a blue rectangle at the top left of the image.

above front

A diagram showing a large gray rectangle with a black border. Inside this rectangle, there is a smaller white rectangle with a black border. The white rectangle is centered horizontally and contains the text "below back" in blue. The gray rectangle is divided into three vertical sections by two thin black lines. The central section is the narrowest, and the two side sections are wider. The white rectangle is positioned in the center of the gray rectangle, overlapping the central section. The text "below back" is written in a blue, monospace-style font.

below back

below front

A diagram showing a large light blue rectangle representing a page. Inside this rectangle, there is a smaller white rectangle with a black border. The white rectangle is centered horizontally and vertically. The text "whole page" is written in blue inside the white rectangle. The large blue rectangle is divided into three vertical sections by two thin black lines. The central section is the narrowest, and the two side sections are wider. The white rectangle is positioned within the central section. The entire diagram is set against a light blue background.

whole page

A diagram of a book cover. The spine is a solid blue vertical rectangle on the left. The back cover is a large grey rectangle. On the left side of the back cover, there is a vertical grey strip representing the back flap. In the center of the back cover, there are two white rectangular labels with black borders. The top label contains the text "bg back flap" in blue, and the bottom label contains the text "bg lF" in blue. They are connected by a vertical line. The entire diagram is overlaid on a white background with a grid of red lines.

bg back flap

bg lF

A diagram showing a rectangular layout. A light gray outer frame contains a darker gray inner rectangle. A vertical blue bar is positioned on the left side of the inner rectangle. Two white boxes with black borders are centered horizontally within the inner rectangle. The top box contains the text 'bg back wrap' and the bottom box contains 'bg lW'. Vertical black lines divide the inner rectangle into several columns, and horizontal black lines divide it into several rows. The text boxes are located in the center of the layout.

bg back wrap

bg lW

bg back

bg 1C

bg spine

bg S

bg front

bg rC

bg front wrap

The diagram shows a rectangular layout. A light gray background contains a darker gray rectangle. On the right side of the darker gray rectangle is a vertical blue bar. Two white rectangular boxes with black borders are positioned in the center of the darker gray rectangle. The top box contains the text 'bg front wrap' and the bottom box contains the text 'bg rW'. The boxes are connected by a vertical line. The entire layout is overlaid on a white background with a grid of red lines.

bg rW

bg front flap

The diagram shows a book cover layout. A large gray rectangle represents the front cover, with a smaller gray rectangle inside it representing the front flap. The text "bg front flap" is centered within the front flap. Below the front flap, the text "bg rF" is centered. To the right of the gray rectangle is a blue vertical rectangle representing the spine. The entire layout is set against a white background with red vertical and horizontal lines.

bg rF

The diagram illustrates the internal structure of a book binding. On the left is a blue rectangular area representing the front cover. To its right is a gray rectangular area representing the book's body. The gray area is divided into several vertical sections by thin black lines. A white rectangular box is positioned in the upper-middle part of the gray area, containing the text 'bg back flap and wrap'. Below this box, and slightly to the left, is another white rectangular box containing the text 'bg 1F-1W'. Vertical lines extend from the top and bottom of these boxes, passing through the gray area. The entire diagram is overlaid on a white background with a grid of red vertical and horizontal lines.

bg back flap and wrap

bg 1F-1W

The diagram shows a large rectangle divided into several sections. A central blue area is bordered by gray sections. The blue area contains two white boxes with blue text. The top box is wider and contains the text 'bg back and wrap'. The bottom box is narrower and contains the text 'bg 1W-1C'. The gray border is composed of several rectangular blocks of varying sizes, with a thin gray vertical strip on the right side of the blue area.

bg back and wrap

bg 1W-1C

bg back and spine

bg 1C-S

bg front and spine

bg S-rC

The diagram shows a rectangular layout divided into several sections. A large gray area covers the left and bottom portions, while a blue area covers the right and top portions. Two white text boxes with black borders are positioned in the center. The top box contains the text 'bg front and wrap' and the bottom box contains 'bg rC-rW'. Vertical red lines are present at the top and bottom edges of the diagram.

bg front and wrap

bg rC-rW

The diagram shows a rectangular layout divided into two main sections. The left section has a light gray background and contains two white text boxes. The top box is wider and contains the text 'bg front flap and wrap'. The bottom box is narrower and centered horizontally, containing the text 'bg rW-rF'. The right section has a light blue background and is empty. Vertical black lines separate the gray and blue sections and divide the gray section into columns. Horizontal black lines separate the two text boxes. Red vertical and horizontal lines form a grid across the entire image.

bg front flap and wrap

bg rW-rF

The diagram shows a rectangular book binding divided into two main color sections: a blue section on the left and a grey section on the right. The blue section is further divided into three vertical panels by two thin lines. The grey section is divided into three vertical panels by two thin lines. Two white labels with black borders are positioned in the center, overlapping both sections. The top label contains the text 'bg back and flap' and the bottom label contains the text 'bg 1F-1C'. The entire diagram is overlaid on a grid of red lines.

bg back and flap

bg 1F-1C

bg back and spine and wrap

bg 1W-S

A diagram illustrating the components of a book binding. It features a central blue rectangular area representing the text block, flanked by gray vertical bars representing the spine and front/back covers. The blue area is divided into three horizontal sections by two thin black lines. The top and bottom sections are further divided into three sub-sections each by thin black lines. A white rectangular box with a black border is centered in the top section of the blue area, containing the text "bg back and spine and front". Below this, centered in the middle section of the blue area, is another white rectangular box with a black border containing the text "bg lC-rC".

bg back and spine and front

bg lC-rC

bg front and spine and wrap

bg S-rW

The diagram illustrates the components of a book binding. It is divided into two main color-coded regions: a grey region on the left representing the back cover and spine, and a blue region on the right representing the front cover. The grey region is further subdivided into several vertical sections by thin black lines. Two white rectangular labels with black borders are positioned in the center of the grey region. The top label contains the text 'bg front and flap' and the bottom label contains 'bg rC-rF'. The blue region also shows some internal vertical divisions. The entire diagram is overlaid on a white background with a grid of red vertical and horizontal lines.

bg front and flap

bg rC-rF

bg back and flap and spine

The diagram illustrates the components of a book binding. A large rectangle is divided into two main color-coded areas: a blue area on the left and a grey area on the right. The blue area is further subdivided by vertical lines into several sections. A white rectangular box with a black border is positioned in the upper part of the blue area, containing the text 'bg back and flap and spine'. Below this box, in the center of the blue area, is another smaller white rectangular box with a black border containing the text 'bg lF-S'. The grey area on the right is also subdivided by vertical lines. The entire diagram is overlaid on a grid of red lines.

bg lF-S

bg back and spine and front and back wrap

bg lW-rC

bg back and spine and front and front wrap

bg lC-rW

bg front and flap and spine

S-rF

bg whole without front flap and wrap

The diagram shows a rectangular layout. A large blue rectangle represents the main content area. To its right is a gray rectangle representing a margin. The blue rectangle is divided into a grid of cells by thin black lines. A white rectangular box is centered horizontally within the blue area, containing the text 'bg whole without front flap and wrap'. Below this box, another smaller white rectangular box is centered horizontally, containing the text 'bg lF-rC'. The gray margin is also divided into a grid of cells by thin black lines.

bg lF-rC

bg whole without flaps

The diagram shows a rectangular layout. A large blue rectangle is centered, with gray rectangles on its left and right sides. Two white rectangular boxes with black borders are positioned in the center of the blue area. The top box contains the text 'bg whole without flaps' and the bottom box contains 'bg lW-rW'. Vertical black lines divide the blue area into sections, and horizontal black lines are also present. Red lines are visible at the top and bottom edges of the diagram.

bg lW-rW

bg whole without back flap and wrap

1C-rF

bg whole without front flap

The diagram shows a book cover layout. A large blue rectangle represents the front cover, and a gray rectangle represents the spine. The blue rectangle is divided into several sections by black lines. A white box with a black border is positioned in the upper-middle section of the blue rectangle, containing the text 'bg whole without front flap'. Below this box, centered, is another white box with a black border containing the text 'bg lF-rW'. The spine is on the right side of the image.

bg lF-rW

bg whole without back flap

bg lW-rF

bg whole

bg lF-rF

back flap

The diagram shows a rectangular layout representing a book cover or endpaper. On the left is a vertical blue rectangle representing the spine. To its right is a large gray rectangle. This gray rectangle is divided into several sections by vertical lines. A central section contains a white rectangular label with the text 'back flap' in blue. Below this label is a smaller white rectangular label with the text '1F' in blue. The entire layout is framed by a light gray border.

1F

The diagram shows a horizontal gray rectangle representing a layer. It is divided into several vertical sections by thin black lines. From left to right: a wide gray section, a narrow blue vertical bar, a wide gray section, a narrow gray section, a wide gray section, a narrow gray section, and a wide gray section. A white rectangular box with a black border is positioned in the middle of the layer, spanning across the third and fourth sections. Inside this box, the text "back wrap" is written in blue. Below this box, centered under the fourth section, is a smaller white rectangular box with a black border containing the text "1W" in blue. The entire diagram is overlaid on a white background with a grid of red vertical and horizontal lines.

back wrap

1W

A schematic diagram of a rectangular layout. The layout is enclosed in a light gray border. Inside, there are several gray rectangular regions. A large blue rectangular region is on the left. To its right, there is a small gray region containing a white box with the text 'back'. Below this box is another small gray region containing a white box with the text '1C'. To the right of these boxes is a large gray rectangular region. Further right, there is a narrow gray vertical strip, and then another gray rectangular region. The entire layout is overlaid on a white background with a grid of red vertical lines.

back

1C

A diagram of a book spine. The spine is a vertical rectangle with a light gray background. A darker gray border is on the left and right sides. A vertical blue strip runs down the center. A white rectangular label is centered on the blue strip, containing the word "spine" in blue serif font. Below the label, the blue strip continues down to the bottom of the spine.

spine

S

The diagram shows a large rectangular frame with a light gray border. Inside, there are several vertical gray bars of varying widths. A central vertical column contains two white rectangular boxes, one above the other, labeled 'front' and 'rC'. To the right of this central column is a large, solid blue rectangular area. The entire structure is set against a white background with red vertical grid lines.

front

rC

A diagram showing a layout within a light gray frame. The frame contains a darker gray rectangle divided into several vertical sections by thin black lines. A white rectangular box with a black border is centered in the middle section, containing the text "front wrap" in blue. Below this box, in the same section, is a smaller white rectangular box with a black border containing the text "rW" in blue. To the right of the central section is a vertical blue bar, and further right is another section. The entire diagram is overlaid on a white background with a grid of red lines.

front wrap

rW

A diagram of a document layout. It features a light gray background with a darker gray border. The layout is divided into several vertical sections by thin black lines. In the center, there is a white rectangular box containing the text "front flap" in blue. Below this box, centered, is a smaller white rectangular box containing the text "rF" in blue. To the right of the central boxes, there is a vertical blue rectangular box. The entire diagram is overlaid on a grid of red lines.

front flap

rF

back flap and wrap

The diagram shows a rectangular layout representing a book binding. On the left is a blue vertical bar. To its right is a gray area divided into several sections by vertical lines. A white rectangular box with a black border is centered in the gray area, containing the text 'back flap and wrap'. Below this box is a smaller white rectangular box with a black border containing the text '1F-1W'. Vertical lines extend from the top and bottom of the '1F-1W' box to the top and bottom of the 'back flap and wrap' box. The entire layout is enclosed in a light gray border.

1F-1W

The diagram shows a rectangular layout divided into several sections. A large blue area on the left contains two white labels: 'back and wrap' and '1W-1C'. The rest of the layout is gray, with a thick gray border around the perimeter. Vertical lines separate the sections, and horizontal lines define the placement of the labels.

back and wrap

1W-1C

back and spine

1C-S

front and spine

S-rC

The diagram shows a large gray rectangle representing a 2D array. It is divided into several vertical sections by thin black lines. A large section on the right is filled with blue. Two white rectangular labels with black borders are positioned in the center of the gray area. The top label contains the text 'front and wrap' and the bottom label contains 'rC-rW'. The entire diagram is overlaid on a grid of red lines.

front and wrap

$rC - rW$

A diagram showing a document layout. A large gray rectangle represents the main content area, surrounded by a lighter gray border. Inside the gray area, there are several vertical lines of varying widths. A white rectangular box with a black border is positioned in the upper-middle part of the gray area, containing the text "front flap and wrap" in blue. Below this box, centered horizontally, is another smaller white rectangular box with a black border containing the text "rW-rF" in blue. On the right side of the gray area, there is a vertical blue bar. The entire diagram is overlaid on a white background with a grid of red vertical and horizontal lines.

front flap and wrap

rW-rF

back and flap

1F-1C

back and spine and wrap

1W-S

back and spine and front

The diagram shows a horizontal rectangle representing a book layout. It is divided into a central blue area and two gray side areas. The blue area is further divided into three vertical sections by two thin black lines. The text 'back and spine and front' is centered in the top section of the blue area, and '1C-rC' is centered in the bottom section of the blue area. The entire layout is enclosed in a gray border.

1C-rC

front and spine and wrap

S-rW

A diagram of a book layout. The book is represented by a large rectangle with a light gray border. Inside, the left side is gray and the right side is blue. The gray side is divided into four vertical sections by three thin black lines. The blue side is divided into two vertical sections by one thin black line. Two white rectangular labels with black borders are positioned in the center of the gray side. The top label contains the text "front and flap" and the bottom label contains the text "rC-rF".

front and flap

rC-rF

A diagram of a book layout. The entire layout is enclosed in a light gray border. The interior is divided into several colored regions: a large blue area on the left, a smaller blue area in the center, and a large gray area on the right. The blue area is further divided by a vertical line. The gray area is divided by two vertical lines. A white rectangular label with a black border is positioned in the center of the blue area, containing the text "back and flap and spine". Below this label, centered in the blue area, is another white rectangular label with a black border containing the text "1F-S".

back and flap and spine

1F-S

back and spine and front and back wrap

The diagram shows a horizontal rectangular layout. A large light blue rectangle is centered within a gray border. This blue rectangle is divided into five vertical sections by thin black lines. The first and last sections are narrower than the three middle sections. A white rectangular box with a black border is positioned horizontally across the middle of the blue rectangle, containing the text 'back and spine and front and back wrap'. Below this box, centered within the blue rectangle, is a smaller white rectangular box with a black border containing the text '1W-rC'.

1W-rC

back and spine and front and front wrap

The diagram shows a horizontal rectangular layout divided into several vertical sections. From left to right, there is a wide gray section, a narrow gray section, a large blue section, a narrow blue section, another large blue section, a narrow blue section, and a final wide gray section. A white rectangular box with a black border is positioned horizontally across the middle of the large blue sections. Inside this box is the text 'back and spine and front and front wrap' in a blue serif font. Below the large blue section, centered horizontally, is a smaller white rectangular box with a black border containing the text '1C-rW' in a blue serif font.

1C-rW

front and flap and spine

The diagram shows a rectangular layout with a grey border. Inside, a large blue rectangle is divided into several sections by vertical lines. A white box with the text 'front and flap and spine' is positioned over the left side of the blue area. Another white box with the text 'S-rF' is positioned below it, centered over the blue area. The blue area is further divided into sections of varying widths, with the largest section on the right.

S-rF

whole without front flap and wrap

The diagram shows a rectangular layout with a light gray outer border and a blue central area. The blue area is divided into several vertical sections by thin black lines. A white rectangular box is positioned horizontally across the middle of the blue area, containing the text 'whole without front flap and wrap'. Below this box, centered in the blue area, is another white rectangular box containing the text '1F-rC'.

1F-rC

whole without flaps

$lW-rW$

whole without back flap and wrap

1C-rF

whole without front flap

lF-rW

whole without back flap

The diagram shows a rectangular layout with a light gray border. Inside is a large blue rectangle. A white box with a black border is centered horizontally in the upper half of the blue area, containing the text 'whole without back flap'. Below this box, centered horizontally, is a smaller white box with a black border containing the text 'lW-rF'. Vertical black lines divide the blue area into several sections: a narrow gray section on the far left, followed by a narrow blue section, then a wide blue section containing the boxes, another narrow blue section, and a final wide blue section on the right. Horizontal black lines are also present, defining the positions of the text boxes.

lW-rF

A diagram showing a large blue rectangle representing a whole, enclosed in a gray border. The rectangle is divided into several vertical sections by thin black lines. In the center, two white boxes are stacked vertically, connected by a vertical line. The top box contains the word "whole" and the bottom box contains the expression "1F-rF".

whole

1F-rF

above back

above front

The diagram shows a light gray rectangular frame containing a darker gray rectangle. This inner rectangle is divided by vertical black lines into seven columns of varying widths. A white rectangular label with a black border is centered in the fourth column from the left. The text 'above front' is written in blue within this label. The entire diagram is overlaid on a white background with a grid of red lines.

A diagram showing a large gray rectangle with a white border. Inside, a smaller gray rectangle is divided into six vertical sections by thin black lines. A white rectangular label with the text 'below back' in blue is centered over the middle sections. A blue horizontal bar is located at the bottom of the image, below the main gray structure.

below back

A diagram of a rectangular object, possibly a book cover or a folder, shown from a perspective view. The object is light gray with a darker gray border. It is divided into several vertical sections by thin black lines. In the center, there is a white rectangular label with the text "below front" written in blue. The object is set against a white background with a grid of red lines.

below front

The diagram shows a large rectangular area with a light blue background. This area is divided into several vertical sections by thin black lines. In the center of this area is a smaller, white rectangular box with a black border. Inside this white box, the text "whole page" is written in a blue, monospaced font. The entire diagram is set against a solid blue background, which is also marked with a grid of thin red lines.

whole page

bg back

bg 1C

bg back hinge

The diagram shows a cross-section of a hinge joint. A large gray rectangular area represents the main body. A vertical blue strip runs through the center, representing the hinge pin. Two white rectangular labels are positioned on the blue strip. The top label contains the text 'bg back hinge' and the bottom label contains the text 'bg lH'. The background is white with a red grid pattern.

bg lH

A diagram of a book spine. The spine is represented by a vertical blue bar. The book cover is a large gray rectangle. The spine is centered on the cover. The label 'bg spine' is on the spine, and the label 'bg S' is on the cover. The diagram is framed by a red border.

bg spine

bg S

bg front hinge

bg rH

The diagram shows a window layout with three main rectangular areas. On the left, there are two overlapping gray rectangles. The top gray rectangle is labeled 'bg front' and the bottom one is labeled 'bg rC'. To the right of these is a large blue rectangle. The entire scene is overlaid on a white background with a red grid.

bg front

bg rC

bg back and back hinge

bg 1C-1H

bg 1H-S

bg spine and front hinge

bg S-rH

A diagram of a window assembly. A large rectangle is divided into a light gray left half and a light blue right half. A horizontal bar is positioned across the middle of the rectangle. The bar is divided into four vertical sections: the leftmost and rightmost sections are light gray, and the two middle sections are light blue. Two white rectangular labels with black borders are placed on the bar. The top label, which is wider, is positioned over the first and second gray sections and contains the text "bg front and front hinge". The bottom label, which is narrower, is positioned over the second and third gray sections and contains the text "bg rH-rC".

bg front and front hinge

bg rH-rC

The diagram illustrates the internal structure of a book binding. It features a large blue rectangular area on the left, representing the front cover and spine, and a large grey rectangular area on the right, representing the back cover. A vertical red line separates the two. The blue area is divided into three horizontal sections by two thin vertical lines. The top and bottom sections are labeled 'bg back and spine' and 'bg 1C-S' respectively. The middle section is empty. The grey area is also divided into three horizontal sections by two thin vertical lines. The top and bottom sections are labeled 'bg back and spine' and 'bg 1C-S' respectively. The middle section is empty.

bg back and spine

bg 1C-S

The diagram shows a central vertical assembly within a larger gray rectangular frame. The central assembly consists of a vertical blue bar with a white rectangular label in the middle. The label contains the text "bg 1H-rH". Above and below this label are blue rectangular blocks, each divided into three vertical sections. The entire central assembly is centered within the gray frame. The text "bg spine and hinges" is written in blue on a white rectangular background, which is positioned above the central assembly.

bg spine and hinges

bg 1H-rH

The diagram illustrates a book binding structure. It features a large rectangular area divided into two main color-coded sections: a light gray section on the left and a light blue section on the right. The gray section is further divided into a large rectangular area and a narrow vertical strip. The blue section is also divided into a large rectangular area and a narrow vertical strip. Two labels are positioned in the center of the diagram, overlapping the gray and blue sections. The top label, 'bg front and spine', is a white rectangle with a black border. The bottom label, 'bg S-rC', is a smaller white rectangle with a black border. The entire diagram is overlaid on a grid of red lines.

back

The diagram shows a control panel layout. On the left is a large blue rectangular area. To its right is a narrow vertical column containing two white rectangular buttons with black borders. The top button is labeled 'back' and the bottom button is labeled '1C'. To the right of this column is a large gray rectangular area. The entire panel is enclosed in a light gray border. Red grid lines are visible in the background.

1C

A technical diagram of a back hinge assembly. It features a large gray rectangular plate with a central vertical blue bar. A white rectangular label with a black border is positioned over the blue bar, containing the text "back hinge" in blue. Below this label, on the blue bar, is a smaller white rectangular label with a black border containing the text "1H" in blue. The entire assembly is set against a white background with a red grid.

back hinge

1H

A diagram of a book spine layout. It features a central vertical column with a blue background. Within this column, there is a white rectangular box containing the word "spine" in blue, serif font. Below this box is another white rectangular box containing the letter "S" in blue, serif font. The central column is flanked by two large, light gray rectangular areas. The entire central assembly is set against a light gray background.

spine

S

A schematic diagram of a front hinge assembly. It features a large gray rectangular plate with a central vertical slot. A blue vertical bar is positioned within this slot. A white rectangular label with a black border is centered on the blue bar. The label contains the text "front hinge" in blue. Below this label, another white rectangular label with a black border is also centered on the blue bar, containing the text "rH" in blue. The entire assembly is set against a light gray background.

front hinge

rH

A diagram showing a rectangular layout within a light gray border. The layout is divided into three main vertical sections. The leftmost section is a large gray rectangle. The rightmost section is a large blue rectangle. Between them is a central column consisting of several gray rectangular blocks. Within this central column, there are two white rectangular boxes. The top box contains the word "front" in blue text, and the bottom box contains the text "rC" in blue text. The entire diagram is overlaid on a white background with a red grid.

front

rC

back and back hinge

1C-1H

The diagram illustrates a cross-section of a book binding. A central vertical strip, colored blue, represents the spine. This spine is flanked by two vertical grey strips, which represent the back hinge. The entire assembly is set against a light grey background. A white rectangular box with a black border is positioned horizontally across the middle of the spine and hinge area, containing the text 'spine and back hinge' in blue. Below this box, another white rectangular box with a black border is positioned vertically, overlapping the spine and the lower hinge area, containing the text '1H-S' in blue.

spine and back hinge

1H-S

The diagram shows a cross-section of a book binding. A large gray rectangle represents the main body of the book. In the center, there is a vertical strip of blue material. This strip is divided into three sections: a top section, a middle section, and a bottom section. The top and bottom sections are wider, while the middle section is narrower. A white rectangular label with a black border is positioned horizontally across the middle section of the blue strip. The text 'spine and front hinge' is written in blue, monospace-style font across this label. Below the middle section of the blue strip, there is another white rectangular label with a black border, containing the text 'S-rH' in blue, monospace-style font. The entire diagram is set against a white background with a red grid of lines.

back and spine

The diagram shows a horizontal rectangular layout. On the left is a large blue rectangle. To its right is a narrow vertical strip divided into three equal horizontal sections. The top and bottom sections are blue, while the middle section is gray. To the right of this strip is a large gray rectangle. A white label with a black border is positioned over the top blue section of the central strip, containing the text 'back and spine'. Another white label with a black border is positioned over the bottom blue section of the central strip, containing the text '1C-S'. The entire layout is enclosed within a light gray border.

1C-S

The diagram shows a large gray rectangle representing a container. Inside, a vertical stack of three blue rectangles is centered. The top and bottom blue rectangles are wider, while the middle one is narrower. A white rectangular label with a black border is positioned over the middle blue rectangle. The text "spine and hinges" is written in blue within this label. Below the middle blue rectangle, another white rectangular label with a black border is positioned over the narrower part of the bottom blue rectangle. The text "lH-rH" is written in blue within this label.

1C-rH

A diagram of a book binding structure. It features a large gray rectangular area on the left, representing the front cover, and a large blue rectangular area on the right, representing the back cover. Between them is a central spine area divided into three vertical sections: a narrow left section, a wider middle section, and a narrow right section. A white rectangular label with a black border is positioned horizontally across the middle of the spine, overlapping the gray front cover and the middle spine section. Below this label, another white rectangular label with a black border is positioned vertically within the middle spine section. The entire binding is set against a white background with a red grid.

front and spine and hinges

1H-rC

The diagram illustrates a neural network architecture. A large light gray rectangle represents the overall system. Inside, a large blue rectangle is divided into three horizontal sections. The top and bottom sections are solid blue. The middle section is further divided into three vertical columns: a narrow left column, a wider central column, and a narrow right column. The central column contains two white rectangular blocks, one above the other, labeled 'whole' and '1C-rC' respectively. The entire structure is overlaid on a white background with a red grid.

whole

1C-rC

above back

The diagram shows a large gray rectangle with a black border. Inside this rectangle, there are four vertical gray bars of equal width and height, arranged in a row. A white rectangular label with a black border is positioned in the center, overlapping the middle two bars. The label contains the text 'above back' in blue. The entire gray rectangle is set against a white background with a red grid of lines.

above front

below back

The diagram consists of a large gray rectangle with a black border. Inside this rectangle, there are four vertical gray bars of equal width, spaced evenly. A white rectangular label with a black border is positioned in the center, overlapping the second and third vertical bars. The label contains the text 'below back' in blue. Below the main gray rectangle, there is a solid blue horizontal bar. The entire diagram is set against a white background with a red grid.

below front

The diagram shows a light gray rectangular frame containing a darker gray rectangle. This inner rectangle is divided into five vertical sections by four thin black lines. A white rectangular label with the text 'below front' in blue is positioned in the center of the inner rectangle. At the bottom of the frame, there is a solid blue horizontal bar.
