Welcome to manjaro i3!

For the graphical installer press **mod+i**, or open dmenu (**mod+d**) and type **sudo calamares**
or for the TUI-installer **Manjaro-architect** run **sudo setup** in a terminal window (**mod+Enter**).
The default mod-key is **<Super>** (Windows-key).
Look&Feel can be changed with **Lxappearance.**
For wallpaper selection use **Nitrogen.**

Audio: The default is **Alsa** with **Volumeicon**. If you'd like to use **Pulseaudio** (plus 32MB) please run '**install_pulse**' in a
terminal to install all necessary packages and have your config adjusted automatically.
This can be reverted by running '**rm_pulse**'.

Most important shortcuts
open new terminal window - **mod+<Enter>**
kill focused container - **mod+<Shift>+q**
open dmenu – **mod+d**
categorized menu 'morc_menu' - **mod+z**

tile vertically - **mod+v**
tile horizontally – **mod+h**
toggle split direction - **mod+q**
toggle floating - **mod+<Shift>+Space**
toggle fullscreen - **mod+f**
toggle sticky - **mod+<Shift>+s**
hide/show i3status-bar – **mod+m**
