

# Welcome to manjaro i3!

The default mod-key is **<Super>** (Windows-key).

Look&Feel can be changed with **Lxappearance**.

For wallpaper selection use **Nitrogen**.

**Audio:** The default is **Alsa** with **Volumeicon**. If you'd like to use **Pulseaudio** (plus 32MB) please run '**install\_pulse**' in a terminal to install all necessary packages and have your config adjusted automatically.  
This can be reverted by running '**rm\_pulse**'.

## Most important shortcuts

open new terminal window - **mod+<Enter>**

kill focused container - **mod+<Shift>+q**

open dmenu - **mod+d**

categorized menu 'morc\_menu' - **mod+z**

tile vertically - **mod+v**

tile horizontally - **mod+h**

toggle split direction - **mod+q**

toggle floating - **mod+<Shift>+Space**

toggle fullscreen - **mod+f**

toggle sticky - **mod+<Shift>+s**

hide/show i3status-bar - **mod+m**

## Application Shortcuts

Bmenu (CLI configuration tool) - **mod+Ctrl+b**

Webbrowser Palemoon - **mod+F2**

Filemanager Pcmmanfm - **mod+F3**

Root Filemanager - **mod+<Shift>+F3**

Alsamixer (or Pavucontrol if you have upgraded to Pulseaudio) - **mod+<Ctrl>+m**

Musicplayer moc - **mod+F5**

Screenshot of whole screen - **<Print>**

Screenshot of focused container - **mod+<Print>**

Screenshot of selection - **mod+<Shift>+<Print>**

Switch off transparency (kill Compton) - **mod+t**

Switch transparency back on - **mod+<Ctrl>+t**

restart Dunst - **mod+<Shift>+d**

xkill - **mod+<Ctrl>+x**

## Navigation

change focus - **mod+arrowkeys** or **mod+j,k,l,ö**

change focus between tiling / floating windows - **mod+space**

move focused container - **mod+<Shift>+arrowkeys** or **mod+<Shift>+j,k,l,ö**
